

It's probably not something you have thought about before, but what is soil? What does it mean to you? What does it make you think about? What impact does it have on your well-being?

1

What is photosynthesis and why is it important? Write a short explanation of photosynthesis, and explain why it is important for us.

2

Write down some of the thoughts and ideas that come to mind when touching and smelling the organic materials we will be handing around.

3

What are the key ingredients in soil?

4

Now that we have talked more about soil, have your views about its importance and meaning for your wellbeing changed? If so, how?

5

Draw and label your own 'Trophic Pyramid':

6

Write down three things you have learned about soil today:

7

- 1.

- 2.

- 3.
