

Llanfyllin Transition Project

A New Vision for Climate Responsibility and a Sustainable Future

We have been successful in our bid for funding to support Llanfyllin High School and community in a 3 year project to place Powys on the map as the frontline for innovation and change.

This exciting three year project commences in September 2016 and aims to find and work with the leaders of the future. Our aim is to build an inclusive vision for our community, one that recognises and understands our responsibilities as global citizens and one that creates exciting new opportunities for work, play and learning.

Using permaculture design we will be building a transition timeline to a carbon negative Llanfyllin by 2046, a vision and plan shaped by the whole community and for the wider benefit of all. The world is changing and as a community we must shape an informed vision of what we want for our collective future!

Our Project Student Led

- * Transition design team.
- * Micro/School-based enterprise.
- * School resource audit.
- * Community currency design and launch.
- * Public information sharing.
- * International school links (Uganda).
- * Vox Pop social audit project.

Project Activity Curriculum Areas
